EDUCATION

Institute of Engineering and Science, IPS Academy Indore, MP   2021 – 2025

Bachelor of Technology – Computer Science and Engineering — CGPA: 7.5

SKILLS

Frontend Development: HTML5, CSS, JavaScript, React.js

Backend Development: Java, Python, Node.js

Database Management: MongoDB, MySQL

Tools: Git, GitHub, VS code, Canva, Figma, NetBeans

DevOps & Deployment: AWS, Docker, GitHub Actions (CI/CD)

Analytical Programming Skills: Data Structures & Algorithms (DSA), Object Oriented Programming (OOP)

EXPERIENCE

Full Stack Developer Intern – Krutanic Solutions with Wipro   January 2025 – March 2025

- Engineered full-stack web solutions using MERN stack, improving system scalability by 30%.
- Participated in Agile development lifecycle including sprint planning, stand-ups, and retrospectives.
- Implemented and optimized REST APIs, reducing response time by 25% through query optimization.

Full Stack Developer Intern – Trumen Technologies Pvt Ltd   May 2024 – July 2024

- Built CRUD operations and front-end features using React.js and Python Flask, improving user experience for over 500+ active users.
- Integrated SQL-based analytics dashboards that provided real-time insights on inventory and user activity.
- Collaborated with UI/UX team using Figma and code to production using AWS EC2.

Web Developer Intern – Teachnook collaborated with Cognizant (IIT Roorkee)   June 2024– August 2024

- Designed a responsive, mobile-first websites using HTML/CSS/JS, achieving 90+ Lighthouse scores in accessibility and performance.
- Conducted cross-browser testing and debugged performance issues, improving load time by 40%.
- Enhanced SEO score and integrated Google Analytics to monitor user behavior.

PROJECTS

Inventory Entry & Management System

- An end-to-end inventory system that managed 1000+ entries with CRUD operations and user authentication.
- Secured APIs using JWT Authentication and deployed backend with AWS Lambda for 10% scalability.

Corporate Website For RhynoEv

- Designed and launched a responsive website for a Gujarat-based EV manufacturer, increasing online engagement by 50% post-deployment.
- Integrated 50+ product catalog and inquiry form backend by MySQL for lead generation.

AI Talkmate Bot

- An AI-based chatbot capable of handling 100+ user queries with a real-time NLP-based backend, resulting in 95% query success rate.
- Implemented lazy loading and virtual DOM optimization to ensure seamless interactions.

Modbus GUI Interface

- Developed a desktop GUI for Modbus communication protocol, allowing real-time configuration of baud rates and device IDs, used by hardware teams in real-time device testing with 70% efficiency.

CERTIFICATES

- **Java Fundamentals –** Udemy - 2025
- **Block Chain Developer –** Indian Institute of Technology (IIT Delhi) - 2024
- **Python For Everybody –** Udemy - 2023
- **DBMS & SQL Mastery –** Udemy – 2023
